

VUCIC Nikola

Internship from April to July

+33 6 31 18 90 52 • nikola.vucic74@gmail.com

22 Rue Surcouf 75007, Paris

SUMMARY

Currently pursuing an engineering degree specialized in Data and Artificial Intelligence, I am completing my program through a work-study position as a Data Scientist at Stellantis. Passionate about data, I apply my skills to transform raw information into actionable insights and value creation. Curious and eager to face new challenges, I aim to keep strengthening my expertise in data science, data engineering, and artificial intelligence. My ambition: to actively contribute to innovative, data-driven projects while evolving in a stimulating environment that values continuous learning and tangible impact.

SKILLS

Data, Programming & AI

- **Python:**
 - data analysis and processing (Pandas, NumPy)
 - task automation and scripting
 - Data Visualization (Seaborn, Matplotlib, Plotly)
 - REST APIs (Flask, FastAPI: API design, data endpoints, model serving)
 - Machine Learning (supervised models, CNNs, dataset preparation and preprocessing)

Front-End Development

- **HTML / CSS / JavaScript:** responsive web design, semantic structure, dynamic user interactions
- **React:** modern UI development, reusable components, state management, navigation

Apache Spark (PySpark)

- Processed large-scale datasets using PySpark
- Built distributed data pipelines for ingestion and transformation

Data Management & Databases

- **PostgreSQL / SQL:** advanced SQL queries, data modeling, relational database design, data manipulation and optimization
- **MongoDB:** NoSQL database management, schema design, document-based data modeling

Data Engineering & DevOps Tools

- **Docker:** application containerization, environment isolation, reproducible deployments
- **Databricks:** data processing, analytics workflows, notebook-based development, large-scale data handling

PROFESSIONAL EXPERIENCE

Reclaim, Business Process Automation - Founder

- Built automated pipelines to digitize business processes: PDF/document data extraction and validation, CRM integration and automation, and custom event-driven workflows (relances, data sync, reporting).
- Impact: delivered end-to-end automation solutions, from data extraction and validation to deployment, cutting manual processing time for client operations.

Paris

2026 – Present

Emotors (Stellantis)

Data Scientist / Data Engineer - Apprenticeship

- **Durability Analytics & Platform Development**
Built DURA, a platform automating mission profile processing, fatigue calculations, and engineering KPIs.
Impact: cut the analysis cycle from ~1 month to 1 week and standardized results across durability teams.
- **Data Engineering & Architecture**
Designed data pipelines and PostgreSQL schemas (15+ tables) processing ~10 GB of time-series data per month.
Impact: 100% automated ingestion with full traceability from raw signals to outputs.
- **Predictive Quality & PPM Analytics**
Developed predictive models to estimate and monitor PPM quality KPIs from production and durability data.
Impact: enabled early detection of quality drifts and data-driven reliability decisions.
- **Automation & Industrialization**
Built 10+ reusable computation modules and automation scripts to standardize durability workflows.
Impact: saved hours per cycle and eliminated recurring manual errors.
- **APIs, DevOps & Scalable Processing**
Built REST APIs; containerized apps with Docker and used Databricks for scalable processing.
Impact: standardized deployment across environments and accelerated cross-team iteration.

Paris

September 2025 - September 2028

CircularPlace

Assistant Project Manager / Product Manager - Apprenticeship

- Developed 5+ automation solutions for data management; automated QA workflows and delivered 10+ features in an Agile environment
- Built AI models: CNN for product classification, regression model for price prediction ($\pm 5\%$ error); developed a CO₂ impact database & calculator
- Extracted and structured 2,000+ data points using Python, APIs, and BeautifulSoup for asset analysis
- Launched a B2B platform, managed inventory across 20+ floors, and coordinated 3+ teams to optimize end-to-end operations

Paris

Août 2024-Août 2025

EDUCATION

ECE

- Engineering Degree in Big Data & Artificial Intelligence
- Data Science & Artificial Intelligence
 - Applied Mathematics
 - Data Security & Project Management

Paris

September 2025 – May 2028

IA SCHOOL

- Bachelor in Artificial Intelligence & Business
- Programming (Python, R, SQL, Excel VBA, BeautifulSoup, Power BI Langage M)
 - Applied Mathematics
 - Marketing

Paris

September 2022- May 2025

EXTRACURRICULAR ACTIVITIES

Chess: regular practice, enhancing strategic thinking, anticipation, and problem-solving skills.

Violin: 10+ years of practice, a lifelong passion developed since childhood, fostering discipline and artistic sensitivity.
